

You may find this character inventory tool helpful to discuss differences and similarities between self-scores and teacher-scores, changes and progress over time, and/or variations in scores in different environments, situations, or class settings. After a discussion, setting one or two goals would be an appropriate next step. It's important to note that this tool should not be used to diagnosis or compare children, nor to compare schools or programs. Please use it to help children focus on their own growth and development in these areas, and as a positive conversation starter.
